SERVICES

01. MACHINE AND EQUIPMENT INSTALLATIONS

IPME installs single new machines in existing plants or complete production lines in greenfield plants.

Our installers are trained in turn-key installations. We rig the equipment being installed to client specifications while meeting the highest demands in precision and installation standards. We also install feeder and control cabling including the cable support systems, be it cable tray or conduit to local or national code requirements.

Our commissioning and startup support teams are available to ensure a smooth project initiation and fine tuning of the equipment. Since we have very little turnover in personnel at our company, our core team of technicians is able to leverage the specific knowledge and expertise gained from each projects. Our concept of continuous improvement is manifested in our commitment to employee training and low turnover. This gives us the expertise, comprehensive consultancy and project servicing which leads to a complete solution concept to meet the needs and demands of the constantly changing market.

03. PLANT RELOCATION

It is one thing to install a plant and make it work; however, it is an art to take a plant apart and reinstall it in a different location and make it work. We have done it in the past and can do it again – for you. Our teams of mechanics and electricians work hand in hand to take your existing installation, inspect and document it piece by piece, package it for safe transportation and take the necessary steps to reinstall everything at its new location. We have close relationships with a variety of machine manufacturers and suppliers giving us additional support to trouble shoot any complications that may arise.

04. OTHER SERVICES

- Design and/or build your electrical panels to UL508a standards.
- Project Management.
- Safety Training, we provide OSHA 10hr, OSHA 30hr classes.

02. INDUSTRIAL ELECTRICAL CONTRACTING

IPME is a licensed electrical contractor with licenses in over 30 States in the U.S. The wiring of industrial plants calls for many years of experience and a good coordinated team of installation experts, and project managers. Below is a list of facilities we do work in:

- Car manufacturing plants
- Food and Beverage plants
- Print Press machine facilities
- Textile plants
- Industrial packaging and processing facilities

As a result, we are well positioned to cover the entire range of industrial cabling tasks including: delivery, installation, and power connection, whether it be copper and/or fiber networks to TIA and ANSI, cabling to NEC or VDE as well as other applicable national and international standards and regulations.

- Provide commissioning support.
- Switch cabinet construction per UL 508 panel shop specifications.
- Manufacture and install our own line of UL listed electrical cable trays.

IPME VALUES AND GUIDELINES

With decades of summarized experience, IPME has specialized in the mechanical and electrical contracting of industrial machinery. Our experience makes its mark throughout the world. We operate throughout the United States and on virtually every continent. IPME stands for precision installation and on-time full scope delivery at competitive pricing while meeting today's highest standards and regulations.

We are committed to professional project management. In the United States IPME has installed projects from East to West and North to South. We hold a general contractors license in several states and are licensed to do electrical work in more than 30 states. People are at the center of our focus which is expressed in the value we put into our customers, employees, and within the communities we operate. They are paramount to our success. In return we have established a loyal customer base with relationships that have endured for decades. We take extreme pride in the fact that a number of employees who started with us are still part of IPME and will be for many years to come. This is the fabric of our organization. We at IPME consider workplace safety a key management function. Our employees and their families are the most valuable asset we have and we do everything necessary to insure

that each employee works in a safe environment that meets the industries highest safety standards. Our managers, supervisors, and technicians regularly attend OSHA safety seminars, receive OSHA certifications and are trained on the equipment they use.

Our multi-cultural workforce travels the world developing experience in dealing with unique problems. This gives us the ability to provide solutions to different needs in different markets, be it regional, industry specific or simply because the client wants it that way. Our managers are trained to PMI (Project Management Institute) standards and some hold PMP (project management professional) certifications. This is documented in a written project management procedure manual that is part of our overall operations procedure process. We deliver turn-key solutions; whether it be bringing in equipment, to installing it down to a tenth of a millimeter using the latest technology, to installing wire ways in either conduit or cable tray, to pulling cable, terminating it and testing it to your specifications then handing it over to your engineers for start-up. All of this can be done with all kinds of materials and in varying environments. Once you have worked with IPME you will appreciate our professionalism.
